Our Added-Value Services make our customers more Cost-Effective & Competitive.

- Frees up inventory space & cash
- Reduces labor & maintenance
- Eliminates repeat testing
- Reduces production-time turn around
- Maximizes Supply Chain Integrity

- 1. On-site Product Weighing & Repacking:** Materials can also be repackaged into desired containers and weighed into precise batch sizes in our compliant and validated repacking center.
- 2. On-site Product Sampling:** Mutchler has a validated GMP sampling room and procedures in order to provide tail-gate, pre-shipment samples of raw materials.
- 3. Release Testing Services:** Mutchler can also provide full-release testing services for USP, EP and JP monographs via the third party laboratory of your choice.
- 4. Excipient Supplier Sample Dispatch Center:** For manufacturers of Excipients, Mutchler offers sampling-dispatch services answering requests and sending samples to users around the world. Samples are taken, packaged and consolidated under a validated protocol and then forward and with all the required documentation to the final destination.
- 5. Vendor Managed Inventory (VMI):** Storage and consolidation of your approved and tested Excipients for immediate transfer into production. Mutchler AVS is an extension of the pharmaceutical manufacturer facilities with validated QA protocols.

All these services designed for customer convenience, quality assurance... and maximum savings!

- One monthly invoice for delivered materials only
- Added-Value Services can be built in to the per Kilo cost of the material, or billed separately

We welcome your price inquiries, audits and certification of our Added-Value Services
